SUMMARY

Tech Lead and full-stack software engineer with over 4 years of experience delivering scalable web and mobile products for enterprise clients in Japan. Strong across the stack in Python/Django, Ruby on Rails, React, Next.js, and Java, with recent focus on Adobe Experience Manager (AEM). Combines hands-on engineering with technical leadership—owning architecture, mentoring engineers, and driving projects from requirements to production.

EXPERIENCE

Sutrix Solutions Japan · Mar 2024 – Present — *Tokyo, Japan · Hybrid*

Tech Lead

Promoted from Software Engineer to Tech Lead in Jun 2026

- Lead architecture and delivery of Adobe Experience Manager (AEM) web solutions for major Japanese enterprises including Panasonic, Sato, Mazda, and YKK.
- Guide a team of 4–5 engineers—owning technical direction, code review, and delivery quality across 3 concurrent client projects.
- Build backend tools in Java and responsive front-end experiences with HTML, JavaScript, and CSS to ship brand-critical, high-quality websites.
- Streamlined task planning and prioritization across the team, improving delivery efficiency and consistently shipping projects on schedule.

Archers · May 2023 – Apr 2024 — *Tokyo, Japan · On-site*

Software Engineer

- Built and maintained a cross-platform matching app (iOS & Android) using Ruby on Rails, React Native, Next.js, and TypeScript, backed by PostgreSQL and MySQL.
- Improved app performance—cutting a key form page's load time from ~16 seconds to ~2 seconds—and refined user interfaces for a smoother experience.
- Partnered with a cross-functional team to translate business requirements into robust, maintainable features.

SBWorks · Mar 2022 – Feb 2023 — *Tokyo, Japan*

Software Engineer

- Re-architected the HLJ.com e-commerce platform to support international customers and multi-region operations.
- Delivered end-to-end e-commerce features across the stack—back-end logic through customer-facing UI—using Python, Django, Docker, REST APIs, and AWS.
- Supported high monthly order volumes across both the Japanese (hlj.co.jp) and international (hlj.com) storefronts, serving customers worldwide.

TECHNICAL SKILLS

Languages: Ruby, Python, TypeScript, JavaScript, Java, SQL
Frameworks & Libraries: React, React Native, Next.js, Django, Ruby on Rails, Stimulus, Bootstrap
Frontend: HTML5, CSS, SCSS, responsive design
Infra & Tools: PostgreSQL, Docker, AWS, Git/GitHub, REST APIs, Adobe Experience Manager (AEM)
Design & PM: Figma, Sketch, Jira, Confluence

LANGUAGES

English (Fluent) · Portuguese (Native) · Spanish (Basic) · Japanese (Basic)

EDUCATION

Le Wagon Tokyo — Web Development 2021
APC, Australia — Leadership & Project Management 2016–2019
FGV University, Brazil — B.A. Business Administration & Management 2011–2015
